

Central Institute of Technology

Central is a lead provider of high quality training to the aged, community and disabilities sector industry in Western Australia. We have a strong track record with over 20 years of experience across over 90 organisations, large and small.

central
INSTITUTE OF TECHNOLOGY

Central is a preferred training provider with Aged and Community Services WA due to our strong networks, professional staff and the high quality of graduates of our training programs. Our training can be customised to fit agency needs.

We specialise in on campus, workbased, Recognition of Prior learning, auspice and workforce development solutions. Just ask us how. Our students are successful with around 80 percent of Central Aged Care students gaining employment upon graduation or whilst on placement. Over 24 agencies in and around the Perth area employed our students last year in the aged care sector.

General Information for future students about Aged Care at Central -
