

Environmental Policy

PMMRAC recognises the importance of environmental sustainability. We will conduct our business in a professional, ethical and responsible manner in compliance with ISO 14001. We will protect and respect the environment and communities in which we operate. We will not compromise the protection and conservation of environmental values and will endeavour to promote and contribute to a sustainable future.

PMMRAC is committed to:

- Continually improving our environmental performance;
- Preventing pollution by incorporating social responsibility and effective environmental procedures as well as utilising environmentally safe and reliable services and products in all our processes;
- Efficient use of natural resources, by reducing waste and where possible, recycling materials in all our business activities;
- Meet and exceed where possible, the compliance with all relevant environmental legislation, regulations, standards and codes to which we subscribe;
- Assessing environmental risks and impacts and where applicable avoiding, minimising, rectifying, reducing or offsetting any harmful effects that our activities may have on the environment;
- Ascertaining the causes of environmental incidents and responding quickly by implementing actions to eliminate recurrence;
- Periodically setting and reviewing environmental objectives and measurable targets to ensure their relevance to our business;
- Regularly reporting on our environmental performance and taking corrective actions where performance does not meet expectations to ensure validity and effectiveness;
- Communicate this policy to all employees to promote environmental accountability and management;
- Encouraging ethical environmental practices and behaviours including respect for traditional rights, customs and cultural heritage.

All Directors, management and employees are expected to promote, implement and communicate this policy to clients and stakeholders. PMMRAC will strive to promote environmental awareness and achieve our goal of being the preferred supplier of our services whilst causing zero harm to the environment.
