WHY OUR COMMUNITIES LOVE OURTOWNS

COMPLETE COMMUNITY DIRECTORY

- Giving consumers information on all local businesses, events and properties on the market instantly.

GEO PINNING TECHNOLOGY

- Conveniently providing all community information based on the user's real time location.

TARGETED CONSUMER CONNECTIONS

- Allowing businesses to market and upsell to their community and visiting consumers.

COMMUNITY & PROPERTY ANALYTICS

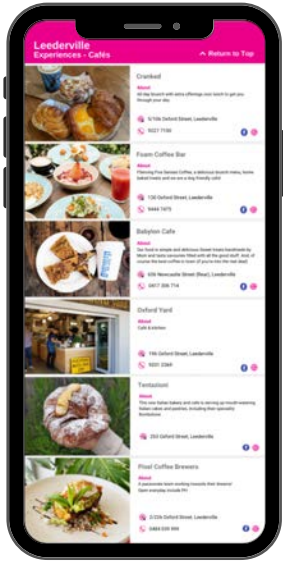

- Giving all users meaningful reports and data on their communities and property.

THE OURTOWNS APP

OurTowns is a one stop directory that connects consumers with local businesses, events and property real time; and provides meaningful reports and data on these markets.

OurTowns is giving local businesses a competitive advantage and consumers exactly what they've been asking for.

"Connecting **OUR** Communities"

Business Directory

Community Analytics Report

INVESTIGATE

We are the first in Australia to merge live feeds from Landgate and the Department Planning, Lands and Heritage to deliver our unique property and community analytic reports.

These give you real time intel and connections to fully immerse yourself in your local community, get insight into all vital data on your property features and identify potential development sites.

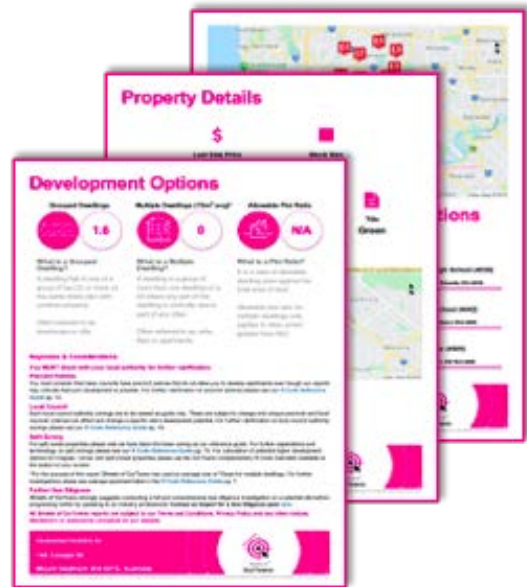

CONNECT AND EXPLORE

We give communities a complete directory of local businesses, events and properties for sale and lease for free.

There is no other platform that offers the same full service that uses geo-locational services for enhanced and instant consumer connections.

OurTowns isn't your ordinary directory, it's a fully integrated, content rich and hyperlocal platform that is supported by analytics - helping consumers connect to their local businesses and vice versa.

Founded and operated in Western Australia, OurTowns is committed to connecting and supporting our communities.

Development Analytics Report
